

Copittrak Mobility

Track and Chargeback Time and Costs associated with BlackBerry Usage

Cell phones have become a very important business tool for Professionals and their usage represents a major source for billable revenue through the capture and chargeback of both time and usage related charges.

Mobility tracks all client related calls, both incoming and outgoing. Through the Copittrak Mobility applet running on the BlackBerry device, users have the option of entering an Account code directly on the BlackBerry device or entering the information at their desktop at a later date.

Mobility automatically routes transactions back to the user's desktop where they can be reviewed. The user can change Account information and decide whether to bill the transaction as a time or usage based cost.

Mobility Highlights Include:

- ✓ Mobility Applet which runs on the BlackBerry device
- ✓ Option for users to enter Account information directly on the BlackBerry device or at their Desktop
- ✓ Works in concert with the Copittrak Desktop to easily authorize and chargeback expenses and time related to mobile phone usage.
- ✓ Compatible with all versions of BlackBerry

The Copittrak Desktop application allows users to easily access their transactions. Users can click on the icon running in the System tray to launch the Copittrak Desktop App.

After correcting the Account code users can choose to bill the transaction as Time, Cost or as Both Time and Cost.

Account	Description	Transaction Date	Phone Number	Destination	Duration	Gross Amount
