

Copittrak Print A&E

Part of the Copittrak Desktop Suite

Automatically Track all your Printer, Plotter and Digital Copier Output

COPITRAK PRINT IS THE INDUSTRY'S MOST ADVANCED DESKTOP PRINT TRACKING SOFTWARE

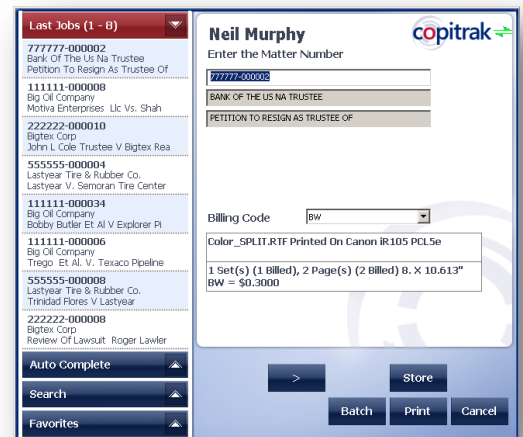

Copittrak Print's features allow users to effortlessly enter Project Numbers at the time of the job. Project Numbers flow automatically from the Firms Financial System into the Copittrak System.

Electronic billing enabled, 1000's of transactions can be transferred into the Billing System in a matter of seconds and Copittrak Print is fully integrated with all Deltek Financial Software Packages.

Features Include:

- Track both local and network print devices.
- Track different prices for different printers and different media types including Wide Format
- Automatically detect color on a page by page basis from within a single document or multi set drawing
- Track by Square Foot or by Page size
- Automatic Push Install Technology
- Smartbar interface for easy access to Project Numbers
- Automatically detects User information via Network login
- Works independently of the Print Environment
- Compatible with all Applications including those from Adobe, Autodesk, Microsoft and Bentley Group
- Compatible with all versions of Microsoft Windows Operating System from Windows 2000 up to Windows Vista

COPITRAK PLOT FILE MANAGER

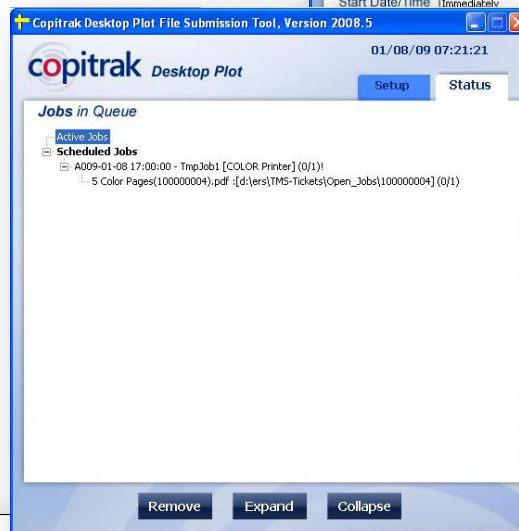

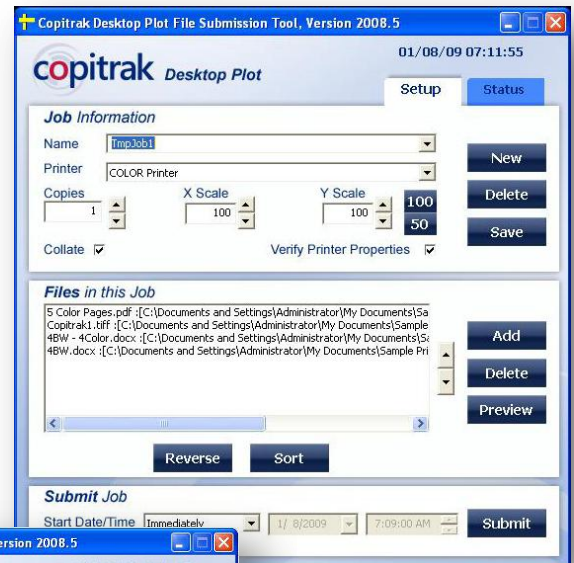

The Copittrak Plot Manager, included with the Engineering Version of Copittrak Print gives Users a convenient and efficient way to track and Batch submit Print and Plot jobs. Because the Plot Manager is Platform independent it provides Users with a single access point for Batch Plotting and Printing to any device.

The Plot Manager ensures that a group of Print jobs or Plots will all print together and in the Order in which they were submitted.

Batch Jobs can be saved by Individual User and recalled later for resubmission.

Users can set number of Copies, Change Scale, do Half Size Plots as well as Collate Sets.

The Print-Plot Manager can handle most common file types including Word .Doc, Adobe .Pdf, TIFF, PRN, TXT and many others.

Advanced Scheduling Tool – With the Scheduling feature users can set complex or large jobs to run at a set time when device usage is minimal.

Built-in Plot Preview Tool – The Copittrak Print Plot Manager has a built-in Plot Preview Feature which allows Users to quickly preview Drawings without opening CAD software. This allows for quick verification that the Drawings they are about to submit are the correct ones.
