## *TCP-IP Communications - Advanced Cost Recovery Features*

Built on Flash ROM technology and 100% solid state, the Copittrak Pro terminal is a reliable and cost effective way for firms to begin tracking copies, scans, faxes and disbursements.

The Pro terminal is a true Client/Server terminal, using State-of-the-Art TCP/IP communications, allowing terminals to communicate back to a central Copittrak server from any point within an existing LAN and WAN network.

The Pro terminal is available in the following configurations: Copy only, Fax only, Copy/Fax, and dual Fax. All versions support tracking of miscellaneous disbursements.

As with our top of the line Eclipse terminal the Pro terminal will also let you view a profile of your last jobs, seamlessly search your client list based on variable criteria and help you complete your data entry with AutoFill.

When linked with Copittrak Print tracking software, the Pro terminal facilitates secure Print for document release at any multifunctional copier/printer. Configured as a fax control terminal, the Pro has a dual-line capability and is compatible with all fax devices. The Pro terminal includes special features for tracking incoming fax as well.

### **Built-in Scan Routing and Tracking**

Automatically routes jobs. Tracks, manages and assigns costs associated with scanned paper documents. Integrated with multifunctional copy/print/scan devices including: (Insert Logos)

- ✓ User information and validation is completely managed by the Pro terminal
- ✓ Automatic Scan Routing

## **Maximum Cost Recovery**

The highest realization of revenues from billable expenses is a hallmark of all Copittrak products. The Copittrak Pro terminal makes it easy for users to enter and validate billing information without interfering with their workflow. The following convenience features ensure maximum cost recovery:

- ✓ Global last job recall of 16 Accounts and Speed Dial of up to 20 Accounts
- ✓ Super Search for account numbers searches alphabetically, phonetically or key word
- ✓ Auto complete – the terminal automatically completes account numbers
- ✓ On-screen display for Non-Billable Account usage.
- ✓ On-screen display of descriptive names for Account validation
- ✓ The terminal will also track other miscellaneous disbursements such as postage or courier charges.

## **Key Features**

- ✓ Full TCP/IP communications
- ✓ DHCP support
- ✓ Real-time Server validation
- ✓ Real-time server transaction storage
- ✓ Designed for minimal network traffic, independent of Account list size
- ✓ Realtime display of communications status
- ✓ Local battery backed up RAM stores all users and transactions if server is offline
- ✓ Auto-detects Color pages within a Black and White job
- ✓ Large 160 character backlit display
- ✓ Qwerty keyboard / convenient numeric keypad
- ✓ Dedicated feature keys – scan, search, speed dial
- ✓ Super Search finds key words from within account description
- ✓ Secure print release
- ✓ AutoFill reduces user keystrokes completing account field automatically
- ✓ Intelligent Field Masking eliminates keystrokes
- ✓ 5 programmable and fully validated data entry fields
- ✓ Centralized configuration and support of terminals
- ✓ Copittrak Scan - Track, manage and assign costs associated with scanned paper documents.
- ✓ Co-exists with present Copittrak systems
