?

Are you ready for a new way to enhance your

collaborative working

hubshare

How is it being used?

Extranets
Securely share sensitive documents and communications, that can be accessed from any device, is the right way to collaborate with clients and partners

Team Collaboration
Efficiently create hubs for each relevant project, centralising all files, deadlines and comments

Business File Sharing
Stop users sharing files via consumer based solutions by providing them with a secure alternative

Sharing Management Information
An automated way to share up to date information with clients

Client Engagement
Be transparent with your clients by providing easy access to all their relevant information and documents

Mobility
Collaborate on files, tasks, deadlines and information from your integrated systems, anytime, anywhere from any device

Project Management
All files, tasks, assignments and comments are in one place so project progression can easily be tracked and deadlines met

### Increase Branding & Business Development
Present your brand and other services to boost your business development

One Client Facing Portal
Integrate any client facing data or information through one portal with one login

Knowledge Sharing
Share resources and files files with colleagues
