

# Edge for Copitrak

Powerful user experience, security, and scan performance

Edge for Copitrak is the most powerful and productive external terminal in terms of user experience and scan performance for the professional market. It is an external hardware terminal with performance comparable to the modern desktop PC which enhances the speed, functionality, and quality of scan delivery all through a single unified user interface. The result leads to improved productivity, efficiency and an enhanced user experience while fulfilling all compliance and network security regulations.

## Business challenges

**Inconsistent user interfaces:** Users who are forced to adapt to inconsistent user interfaces are less efficient and productive. Additionally, this can cause frustration and lead to poor satisfaction and an unhappy workforce.

**Inefficient scanning workflows:** Without a consistent user interface, it makes it harder for the user to perform their scan workflows efficiently. Also, without the right technology in place users are not able to take full advantage of advanced scanning workflows that lead to increased user satisfaction and ultimately an improvement in productivity and scanning efficiency.

**Security and compliance risks:** The pains of meeting compliance regulations and enforcing standardized processes are common occurrences that reduce efficiencies and can lead to expensive fines. Organizations that are using older technology open themselves up to security and compliance risks. It is also harder for them to manage and secure their environment.

## Key benefits

- Unified user interface
- Powerful, efficient scanning workflows
- Increased security

## Key features

- Support various scanning modes such as local push, network push or pull scanning.
- Provides an option for integrated Multi-Card reader
- Adaptable to most MFD makes and models
- Quick, convenient user access with intuitive Smart bar interface
- Convenient access to Super-search, job recall, favorites, and other key features
- Easily viewable quick scan feature for quick and convenient scanning
- Larger screen: 12.1" 1024 x 768 color graphic touchscreen
- Integrated numeric keypad for quick, convenient access.
- Full keyboard with available touchpad

systems auditing

## Benefits

**Unified user interface:** With a consistent, unified interface across all makes and models of MFDs your users will not need to adapt the different user interfaces in a mixed MFD environment. This allows your users to work fast, smarter, and more efficiently.

**Powerful, efficient scanning workflows:** Utilizing the new Edge pull scanning mode, you can now initiate your scans directly from the Edge terminal's interface. Edge provides enhanced imaging processing capabilities where you can control resolution, DPI, contrast, brightness, autocolour correction and duplex which streamlines your scanning process. This minimizes the need of time consuming, post image processing and allows your users to be more productive and efficient.

**Increased security:** Copitrak Edge comes installed with the latest Windows 10 operating system providing your organization with greater security that is easy to manage and control. This allows your organization to install the latest network security policies and administer them remotely.

## Feature comparison

Edge for Copitrak is a powerful terminal that will enhance your scanning workflows, make your organization more secure and ultimately improve the productivity of your workforce. The Copitrak Edge terminal is intended to replace your current Copitrak eClique terminals due to its enhanced security, advanced scanning features and overall functionality.

The Edge terminal is a hardware product only. It is sold separately from the Copitrak software. To utilize the software as described it will require a separate purchase.

Key Features	Copitrak eClique	Copitrak Edge
Larger screen	8" LCD touch panel 800x600	12.1" LCD touch panel 1024x768
Faster performance	More than 10 years old ARM processor	The power of a modern Intel based CPU
Security/Encrypted protocol	Windows CE 4.2	Windows 10
Scanning functionality	Folder watch (network only)	Folder Watch (Support local or network).*
Card reader options	External only	Integrated Multi-Card and external
Includes (in box)	Monitor	Monitor, PC, and keyboard
Accessories (buy separately)	Keyboard floor stand with keyboard tray desk mount	Floor stand with keyboard tray

\*TWAIN scanning will be added for different makes and models of MFPs.
